

The WiMAX advantage

Binary Broadband is the exclusive provider of licensed WiMax technology in the Peace Country. All of our towers have not only had their technology upgraded, but also the transmission power has been significantly increased. We are pleased to now be able to provide service to our customers without the need for extra high-gain antennas or reflector dishes. If you are within Grande Prairie's city limits, the Town of Rycroft, Fairview or Spirit River, ask us about our new plug and play indoor units.

Licensed vs Unlicensed ... The real differences between WiFi and WiMAX

- Long term reliability with fewer service disruptions = less down time
- Stable, reliable, and dependable VPN
- Consistently crystal clear phone calling with Binary VoIP
- Less down time
- Longer distance with a sleeker antenna
